

PROFILE

I am a Systems and Computer Networks Engineering student at UGB, currently in my 7th academic cycle, with a focus on backend development and project management, and a strong interest in the Product Owner role.

I possess strong analytical skills, work effectively in team environments, and adapt quickly to new technologies. I consider myself proactive, capable of performing under pressure, and a confident public speaker. I am always eager to learn, grow professionally, and contribute to the success of the team.

EXPERIENCE IN ACADEMIC PROJECTS

Veganimo – Educational Platform for Vegan Recipes and Lifestyle

Backend Developer & Product Owner

As part of a development team, we created an educational platform focused on promoting vegan lifestyles and recipe creation

I served as both Backend Developer and Product Owner, coordinating development activities and managing project progress to ensure successful delivery.

Console Express – Educational E-commerce Platform for Consoles and Video Games

Backend Developer

I contributed to the development of an online store platform focused on the sale of gaming consoles and video games, working as part of a development team and optimizing backend functionality to ensure efficient system performance.

Digital Design and Modeling – Logo Design for Embroidery Machinery

Worked on the design and digital modeling of logos specialized for embroidery machine applications, delivering customized solutions for various design requirements.

EDUCATION

Gerardo Barrios University (UGB)
Bachelor's Degree in Systems and Computer Networks Engineering
2023 – Present

National Institute of Usulután
Vocational Technical Degree in Software Development
